

Demo sets

LagoLED® & DecaLED® Demo Sets are simple, yet effective demonstration kits, designed to allow you to sample and test the products, and to look into their range of applications. These are of course supplied at a minimal price and are extremely simple to install!

The demo sets on this page are all equipped with a power supply unit, extension cable and the product or product group that you have selected. The Demo sets follow the 'plug and play' principle; no soldering or assembly is required. All demo sets come complete with a manual and assembly photos. Further information regarding the demo sets can be found in the product information. Your regular discount applies to all demo sets.

RGB Strip / DEKO Panel Demo Set

The RGB Strip / DEKO Panel Demo Set is highly suitable for testing the LagoLED® RGB Strip and the LagoLED® DEKO Panel. Both products are suitable for applications in high quality interiors, partition walls or coves.

Since the introduction of these LagoLED® products, they have proved to be of major interest to designers and architects seeking a high quality, exclusive product. The demo set contains a regular LagoLED® RGB strip, fitted into a LagoLED® Pro frame with a NEON line.

This set also contains a 33x33 LagoLED® DEKO Panel with a Dot-matrix print. All standard and customer-specific panels can of course be supplied with a Dot or Stoch matrix print or with an inscribed logo. Please see page 11 for further information regarding the different prints for the LagoLED® DEKO Panel.

The set comes complete with a 90-230VAC plug-in power supply unit and a user-friendly, manual controller.

LagoLED® Demo set RGB Strip / DEKO Panel	
Product specification	
Code	95721000
Description	Demo set RGB Strip / DEKO Panel
Price	See pricelist

95740480	Bracket for LagoLED® Strips
95740304	Flat wire, 100cm, incl. connectors

DMX-i Strip / DEKO Panel Demo Set

The **DMX-i Strip / DMX-i DEKO Panel Demo Set** is highly suitable for testing the **LagoLED® DMX-i RGB Strip** and the **LagoLED® DMX-i DEKO Panel**. Both products are suitable for applications in high quality interiors, partition walls or coves.

The **LagoLED® DMX-i RGB Strip** is an intelligent, 30 cm long LED strip, equipped with red, green and blue LEDs. The **LagoLED® DMX-i RGB Strip** contains a separate processor on the rear of the strip, allowing the strip to be assigned a unique DMX start address. This technology makes it possible to light a **LagoLED® DMX-i DEKO Panel** (equipped with 2 **LagoLED® DMX-i RGB Strips** or more) with several colours simultaneously, instead of with a uniform colour across the entire panel.

The demo set contains a 30cm **LagoLED® DMX-i Strip**, a 33x33 **LagoLED® DEKO Panel** with the patented Dot matrix, a 90-230VAC plug-in power supply unit and a user-friendly, manual controller.

Neon Line Demo Set

The **Neon Line Demo Set** provides you with the opportunity to use the product within a test environment and can also be used for demonstration purposes in your showroom. The **DecaLED® Neon Line** is highly suitable for outdoor applications and for general line lighting.

The **DecaLED® Neon Line** is an IP67-rated product, designed to replace traditional neon lighting. The **DecaLED® Neon Lines** are available in 4 colours: red, green, blue and white. All colours are available in lengths of 400mm, 600mm and 1000mm.

In addition to a plug-in adapter, which is already connected to one of the starter cables that we usually supply separately, the **DecaLED® Neon Line** demo set also comprises five **DecaLED® Neon Lines**. The demo set contains **DecaLED® Neon Lines** in the colours red, green, blue, white and yellow.
