

Demo sets

Flex RGB / RGB HD Demo Set

The Flex RGB / RGB HD demo set is highly suitable for using the DecaLED® Flex RGB and DecaLED® Flex HD within a test environment. The DecaLED® Flex RGB and DecaLED® Flex HD are highly suitable for applications in cove lighting and line lighting and as indirect lighting.

The DecaLED® Flex RGB and DecaLED® Flex RGB HD are flexible, multicoloured LED strips and are 5 (DecaLED® Flex RGB) and 2.5 metres (DecaLED® Flex RGB HD) in length. Both strips are equipped with 3M tape on the rear to facilitate easy installation.

The demo set contains 1.2m of DecaLED® Flex RGB and 1.25m of DecaLED® Flex RGB HD. The difference between the regular and HD version of this product is the number of LEDs per metre. The regular Flex RGB contains 30 per metre, whereas the HD version contains 60.

The set comes complete with a 90-230VAC plug-in power supply unit and a user-friendly, manual controller.

The fact that this demo set contains both versions enables you to make a simple comparison of the difference in light intensity. This means that you can select the product that best suits the requirements of your application.

Flex SC Demo Set

The Flex SC Demo Set is highly suitable for demonstrating the DecaLED® Flex SC products within a test environment. The DecaLED® Flex SC products are highly suitable for applications in cove lighting and line lighting and as indirect lighting.

The DecaLED® Flex SC is supplied in various colours, including red, green, blue, cool white, amber, warm white and purple. All DecaLED® Flex SC products are supplied in rolls of 5 metres and are equipped with 3M tape on the rear as standard.

The set contains individual strips of 60cm in all 7 of the available colours. The demo set is supplied inclusive of a 90-230VAC power supply unit, allowing you to test the LED strips using the extension cable provided, in the comfort of your home, at the office or on location. All LED strips can be changed easily using the linked connectors.

Cove Flex RGB Demo Set

The DecaLED® Cove Flex RGB demo set is ideal for testing the DecaLED® Cove Flex RGB within a known environment. The DecaLED® Cove Flex RGB is an ideal product (IP55) for lighting coves and light boxes.

The DecaLED® Cove Flex RGB is a flexible, multicoloured LED tube, which is suitable for indoor use, but also for outdoor projects, thanks to its IP55 rating. With 35 RGB LEDs per metre, the DecaLED® Cove Flex RGB guarantees an intense and powerful light effect for cove lighting, line lighting and other indirect lighting applications.

The demo set contains 1 metre of DecaLED® Cove Flex RGB and also, by way of introduction, contains various accessories that are required for a complete installation. The set comes complete with a 90-230VAC plug-in power supply unit and a user-friendly, manual controller.
