

Demo sets

IP Strip & Square Demo Set

This demo set combines the very popular DecaLED® IP Strips and DecaLED® Squares. Both products are ideal for use in illuminated advertising and commercial signs. The two products also come in a range of different colours and lengths.

The DecaLED® IP Strips and Squares are products that are very suitable for outdoor use and are therefore ideal for incorporating into illuminated advertisements, or for lighting commercial signs or panels. The DecaLED® IP Strip comes in a range of different lengths and colours, as do the DecaLED® Square Quattro and Duo. A small demonstration piece of each colour is included in this demo set. The set also includes a demo of the IP PSU 30W, which is used frequently in outdoor applications.

The demo set contains a 50 cm DecaLED® IP Strip of all of the available colours, including red, green, blue, white and amber. This set also contains both the Duo and Quattro version of the DecaLED® Square in all of the available colours: red, green, blue, white and amber. The set comes complete with a 90-230VAC plug-in power supply unit and an extension cable.

Dot & Dot DMX Demo Set

This demo set contains the DecaLED® Dot and DecaLED® Dot DMX, which are highly suitable for projects that require a very focussed, multicoloured light spot. The DecaLED® Dot and Dot DMX are suitable for use in multicoloured star cloths or an interactive wall/ceiling.

The DecaLED® Dot is supplied with a small cone as standard and requires a DecaLED® Controller 2 or DecaLED® Controller 2 Mini to enable complete RGB control.

The DecaLED® Dot DMX is an intelligent dot, which can be controlled via DMX. The start address can be changed by using the DecaLED® Setup Tool.

The demo set comprises one DecaLED® Dot and one DecaLED® Dot DMX. The DecaLED® Dot DMX is set to run a standard program, which will commence when you have connected the 24VDC adapter to the product. The DecaLED® Dot must be connected to the user-friendly, manual controller and 90-230VAC plug-in power supply unit provided.

Neon Flex RGB Demo Set

The DecaLED® Neon Flex RGB Demo Set is suitable for testing the DecaLED® Neon Flex RGB in a controlled environment. The Neon Flex RGB is highly suitable for multicoloured lighting of contour and indication lines.

The DecaLED® Neon Flex RGB was designed as a replacement for conventional neon lighting and offers a multitude of colours thanks to the RGB LEDs. The DecaLED® Neon Flex is equipped with an opal, flexible cover and can be controlled using the DecaLED® Controller 4.

The DecaLED® Neon Flex RGB can be controlled with the DecaLED® Manual Controller (24VDC) provided. The demo set must be connected to the user-friendly, manual controller and 90-230VAC plug-in power supply unit provided.

High Power Replacement Bulbs Demo Set

The DecaLED® High Power Replacement Bulbs are LED light sources that have been designed as a replacement for existing, conventional light sources. The High Power Replacement Bulbs demo set is equipped with MR11, MR16 and GU10 LED replacement light sources.

The DecaLED® High Power Replacement Bulbs Demo Set offers a very attractive solution for new and existing applications. This demo set contains both the 3W and 5W version of an MR16 connection, in white and warm white. The set also includes an MR11 version in white and warm white. These six different LED replacement light sources make it easier for you to find the best possible solution to your replacement light source requirements.

The demo set must be connected to the user-friendly, manual controller and 90-230VAC plug-in power supply unit provided. An additional extension cable is included to make it easier for you to test the product in the comfort of your own home, at the office, or on location.
