

Fader Panel DMX

The LagoLED® Fader Panel DMX is a simple, user-friendly control panel that facilitates programming and control of LEDs. The LagoLED® Fader Panel DMX is used in public places and business premises, often in combination with LED lighting.

The LagoLED® Fader Panel DMX is a user-friendly control panel that can control a total of six DMX channels. These channels are controlled from the panel using the six faders and allow for intuitive control. In addition to these six faders, there is a 'master' fader. This fader can be used to determine the intensity of the channel faders. Users can also save six programs in the LagoLED® Fader Panel DMX and call these up from the memory. It is also easy to set a static colour using the faders. The LagoLED® Fader Panel DMX can be fitted to a standard electrical back box. The six DMX channels that control the panel are output over the entire DMX512 spectrum.

The LagoLED® Fader Panel DMX comes complete with a remote control and DMX distributor. This DMX distributor must be linked to the LagoLED® Fader Panel DMX using the RJ45 cable provided. The DMX distributor operates on 230VAC and generates the DMX signal with which you control the LagoLED® and DecaLED® Controllers.

LagoLED® Fader Panel DMX

Product specification

Code	9576081 I
Description	LagoLED® Fader Panel DMX, built in, DMX, 6 channels
Price	See pricelist
Voltage	230 V AC
Control	6 channels, programmable
Dimensions	Panel: 86 x 86 x 45 mm Control: 157x74x43
Weight	900g
