

Presentation Desk

LagoLED® Space

LagoLED® Box

LagoLED® Presentation Desks combine a futuristic and modern design (stainless steel) with high-quality LED lighting. LagoLED® Presentation Desks are therefore highly suitable for auditoriums, event halls, corporate meeting rooms and as a rental item.

The LagoLED® Presentation Desks come in 4 versions: the Origin, Arc, Space and Box. All 4 incorporate LagoLED® RGB Strips, which guarantee a high-quality beam and a long service life. The Presentation Desks can be supplied with 3 different types of panel, e.g. with a DOT matrix or Stoch matrix print, or with a logo or text engraved into the panel. All LagoLED® Presentation Desks are fully ready for use upon delivery and have a standard range of colours. The LagoLED® Presentation Desk can also be connected to a DMX input which will change the colour.

A range of accessories are available for the LagoLED® Presentation Desks. You can opt, for example, to integrate additional reading lighting, a connection for audio equipment and a mains voltage connection into the topside of your LagoLED® Presentation Desk. Your LagoLED® Presentation Desk is equipped with a direct DMX input as standard. A further option is to control your LagoLED® Presentation Desk via a remote control. Ask your contact person about the options for your selected LagoLED® Presentation Desk.

Related products include the LagoLED® Origin, Arc, Space and Box.
