

Sign

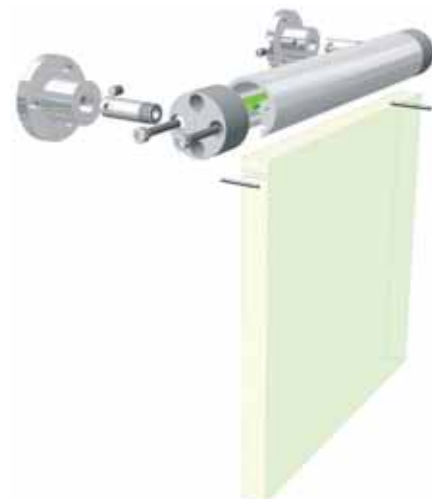

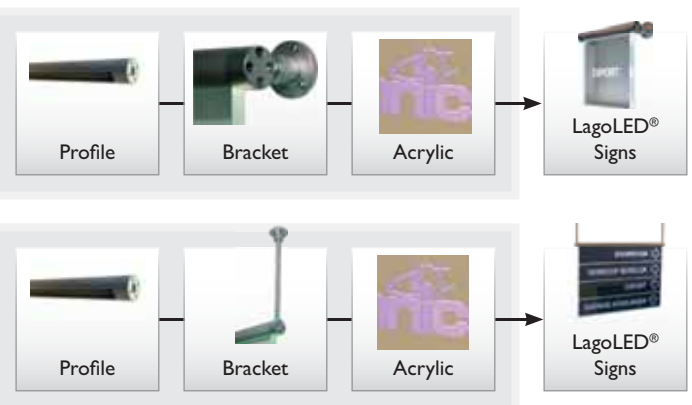

LagoLED® Signs are unique, high quality signboards, equipped with LED lighting. LagoLED® Signs are used in corporate buildings, theatres and museums, and anywhere the public requires directional guidance.

LagoLED® Signs are equipped with 15, 30 or 60 cm blue LED strips which light up a panel that has been manufactured to size. The panels can be inscribed with a business logo, text or a symbol and can vary in length from 15 to 60 cm, depending on the text length and the application. The LagoLED® Signs are delivered exclusive of the connection brackets and acrylic panel. These must be ordered separately.

LagoLED® Signs are equipped with white, red, or green LEDs. It is also possible to opt for a (variable) combination of red and green LEDs. Two different versions of the bracket are offered, including one for mounting on the wall and one for attaching the sign to the ceiling, with the corresponding spacers. The spacers are available in two different sizes: 40 and 800mm. The DecaLED® Dimmer for 12/24V is available for the single colour version. Further information on this product can be found on page 117.
