

The LagoLED® Wall Panel DMX is a simple, user-friendly control panel that facilitates programming and control of LEDs. The LagoLED® Wall Panel DMX is used in public places and business premises, often in combination with LED lighting.

The LagoLED® Wall Panel DMX is a user-friendly control panel that can control a total of twelve DMX channels. These channels are controlled from the panel selecting one of 10 pre-programmed effects. It is also easy to set a static colour using the buttons on the LagoLED® Wall Panel. The LagoLED® Wall Panel isn't suited to program your own effect, for this we offer the LagoLED® Fader Panel. The LagoLED® Wall Panel DMX can be fitted to a standard electrical back box. The twelve DMX channels that control the panel are output over the entire DMX512 spectrum.

The LagoLED® Wall Panel DMX comes complete with a remote control and DMX distributor. This DMX distributor must be linked to the LagoLED® Wall Panel DMX using the RJ45 cable provided. The DMX distributor operates on 230VAC and generates the DMX signal with which you control the LagoLED® and DecaLED® Controllers.

# Wall Panel DMX

### LagoLED® Wall Panel DMX
